PROFESSIONAL SUMMARY

Computer Engineering student at Tecnológico de Costa Rica with a solid background in programming, algorithms, and digital systems, as well as databases (SQL and NoSQL). Hands-on experience with Assembly, along with strong foundations in Python, C, C++, Java, and C#. Former Intermediate IT Network Technician with knowledge of networking and computer systems. Able to work independently or in teams, open to feedback and collaboration to deliver clean, reliable solutions. Honest, responsible, and committed to continuous learning and professional growth.

EDUCATION

Tecnológico de Costa Rica

Cartago, Costa Rica

Bachelor's Degree in Computer Engineering (in progress) — 2024 – Present

- Completed courses: Introduction to Programming, Algorithms and Data Structures I & II, Principles of Engineering Modeling, Programming Paradigms, Circuit Analysis and Direct Current (DC), Databases, and others.
- Currently enrolled: Alternating Current Circuits (AC), Active Elements, Electric Circuits Laboratory, and others.

CTP Fernando Volio Jiménez

Quebradilla, Cartago, Costa Rica

Technical Degree: Intermediate IT Network Technician — 2017 – 2022

TECHNICAL SKILLS

Programming Languages: Python, C, C#, C++, Java, C#, TypeScript, Racket

Web & Backend Development: React, Node.js, Express, RESTful APIs, .NET Framework, Tailwind CSS, Vite, shadcn/ui

Databases: Microsoft SQL Server, MySQL, SQL & NoSQL, Stored Procedures, Transactions, Data Modeling

Hardware & Digital Systems: Assembly, Verilog (basic), Computer Architecture, Digital Circuit Design, Electronic Simulation Tools

Networking & Tools: Network Configuration, Structured Cabling, IT Essentials (Cisco), Git/GitHub, Linux, Docker, Grafana, Visual Studio, Wireshark, Microsoft 365

PROJECTS

F1 Garage Manager — React, TypeScript, Node.js/Express, Microsoft SQL Server, Docker, Grafana

- Full-stack F1 team-management system (CE-3101 Databases, TEC): role-based authentication, CRUD for teams/cars/inventory, stored procedures and transactions enforcing business rules, a race-simulation engine, and a Grafana analytics dashboard.

Genetic Kingdom — C++

- Tower-defense game (Algorithms & Data Structures II) combining pathfinding with evolutionary/genetic algorithms to drive enemy behavior.

Conveyor Belt Image Analyzer — JavaScript, Python, C#, HTML

- Image-classification system that identifies tomatoes and potatoes on a conveyor belt and triggers the physical sorting mechanism to separate them into bins.

DonCEy Kong Jr. — Java, C/Raylib

- Multiplayer game (Programming Paradigms) built on a client-server architecture: Java server, C/Raylib client.

BusCEMinas — Racket

- Functional-programming implementation of Minesweeper (Programming Paradigms), exploring Racket and functional-programming paradigms.

WORK EXPERIENCE

Teaching Assistant – General Chemistry Lab — Tecnológico de Costa Rica

2024 – 2026

- Assisted students during laboratory sessions; reviewed and graded lab reports and evaluations.

Internship — Universidad Estatal a Distancia (UNED)

Oct – Dec 2022

- Performed computer equipment maintenance, troubleshooting, and network configuration.
- Created technical documentation and procedural guides; assisted in robotics course instruction and student support.

CERTIFICATIONS

- Cisco: CCNA 1, IT Essentials, Cybersecurity Essentials, Introduction to IoT, Networking Devices and Initial Configuration (2020–2022). Linux Foundation: Linux Essentials / Linux Unhatched (2022).

LANGUAGES & ADDITIONAL INFO

Spanish: Native

English: B2 (UCR Language Proficiency Test, 2022; FUNDATEC, 2023)

German: A1 (Beginner) | **Driver's License:** B1 (own vehicle)
